## PROFESSIONAL SUMMARY

Software developer with five years of experience in designing, developing, and implementing technology solutions across banking, oil, and transportation industries. Getting MBA degree has provided me with a deep understanding of business processes, excellent problem solving and critical thinking. Being passionate about programming, I updated my programming skills, and incorporated my skills as an analyst to understand customer needs and deliver high quality software. I am a team player, striving to meet the highest standards in any organization I have worked. I am well suited for software developer, web developer and full stack developer roles in healthcare, bio, financial, banking, and insurance industries.

## TECHNICAL SKILLS

Node.js, Express, JavaScript, jQuery, React.js, React Native, GIT, Github, MongoDB, MySQL, Microsoft SQL Server, Agile Methodology, Firebase, HTML, CSS, Bootstrap, Media Queries, APIs, JSON, REST, AJAX, the command line, computer science fundamentals, writing tests.

## PROJECTS

**North Hollywood Church** <https://528491.github.io/Project-1/>

- Used Google and Facebook OAuth to authenticate users.
- Used Firebase to create customized authentication.
